

## **Marc A. Child CISSP, GICSP**

Marc Child is an information security professional with twenty-three years' experience in cyber, physical, personnel, and data security. As Information Security Program Manager for Great River Energy, he has responsibility for managing the design and implementation of a security program for Minnesota's second largest electric utility, including ensuring compliance with NERC Critical Infrastructure Protection regulations. From 2016-2020, Marc served as Chairman of the Critical Infrastructure Protection Committee at the North American Electric Reliability Corporation (NERC) – and has volunteered in various security roles with the regional reliability authority, the Midwest Reliability Organization. Marc earned his CISSP certification in 2000 and completed his GICSP certification in 2014 (Industrial Cyber Security).

In 2021 he was honored to receive the first annual electricity sector security service award from the electricity information sharing and analysis center (E-ISAC).

Marc lives in central Minnesota with his wife Lisa and two teenagers, who look up from their phones once in a while.
