Scott Kuchta is an architecture and engineering project manager, land-use planner and design consultant with 15 years of diverse project management experience in the fields of engineering, architecture, development, natural resource planning including sustainable land use development. He specializes in directing collaborative A/E work that brings together multiple project stakeholders including communities, non-profits, state and federal regulators, contractors and clients to create successful, sustainable projects.

With Hass & Associates, Scott represents municipal owner clients on a variety of infrastructure and development projects. His current work includes managing a municipal-commercial retail 3P land and roadway corridor development project, and designing a new lion and tiger habitat enclosure for a historic community zoo. Previous professional experience includes architecture and development management for a residential community design-build-development firm, and director of a green infrastructure development program.
